Eco-Rating Certification is Now More Accessible Than Ever

Clear Criteria. Flexible Process. Enhanced Support.

Green Key Global has introduced several enhancements to its Eco-Rating program to help hotels move through the certification process more efficiently, allowing hotel staff to focus on what matters most: delivering exceptional guest experiences.

Together, these enhancements enable properties to pursue certification with greater efficiency, strengthening operations and supporting RevPAR growth.

What's Changing?

Clear Core Criteria: We've defined the program's baseline requirements, 37 mandatory questions in the current Eco-Rating assessment, that constitute the minimum requirements for a 1-Key Eco-Rating Certification.

Flexible Assessment: Members who meet the Core Criteria may either qualify directly to the audit phase or answer additional questions to pursue a higher Eco-Rating.

Expanded Toolkit: Each mandatory question will include supporting tools and resources that properties can use to develop and strengthen their sustainability practices.

Your Clear Path to Eco-Certification

- You'll be able to isolate the Core Criteria questions by selecting the "Display Core Criteria Only" option. This feature allows members to focus exclusively on the 37 baseline requirements.
- Core Criteria questions will be clearly identified within the assessment as "mandatory". All Core Criteria questions must be completed to be eligible to submit your assessment and qualify for an audit.
- Once completed and the appropriate documentation has been uploaded, you'll be eligible for an audit and, therefore, an opportunity to qualify for 1-Key Eco-Rating.
